ATE ACC	QUIRED						
		SOURCE EVALUATION	ONS ARE DEFINITIVE.	APPRAISAL OF CONTENT	IS TENTATIVE.		-
1. The Telish Airfield can be seen clearly from the road which comes from Makhlata (N 43-27, E 24-16) which is located north of Telish (N 43-20; E 24-16). The airfield is situated on both sides of this road, but the largest part is located on the west side of the road. The northern section of the sirfield is bordered by a railroad line. Two hangars and a headquarters building are located in the middle of the airfield, and a large 3-story building is located further west.					25 X 1		
						25X1	
2.	2. Two kilometers north of the airfield and about 200 meters west of the road there is an area surrounded by a hedge. Small buildings with tiled roofs were seen here, as well as five masts. This is probably a radio station or a ground to air control instablation.				gs with tiled roofs
